

## Green Your Deliveries

Shopping online and sending your deliveries to a Kinek Point doesn't just save you time; it can help reduce your carbon footprint. Here are just three ways that using Kinek and shopping online can help green your deliveries:

---

When you shop online, you avoid driving around town and spending time in an idling car. Less parking spaces and traffic congestion means more green spaces.

When you shop online, only the items you decide to purchase are shipped from the manufacturer (as opposed to the overstocking and returning of items that traditional retailers have to deal with).

---

When people in and around your neighborhood all ship to a Kinek Point, they reduce the number of miles delivery trucks have to travel. Fewer stops means less fuel consumption and, since someone will always be at a Kinek Point to accept your parcel, there are no repeat delivery attempts.
